atrevete.fun User Manual

This manual explains how to access and use atrevete.fun, manage profiles and ads, unlock galleries, use the wallet, and configure your account.

1. Access and security

atrevete.fun is a platform exclusively for people aged 18 and over. Create an account, confirm your email address, and use a personal password. Do not share your credentials. If two-factor authentication is enabled, enter the code from your authentication app when signing in.

On the first screen you can choose Profiles or Ads. From any private area, the Profiles link in the header takes you directly back to the grid.

2. Profiles

The grid shows available profiles sorted by different criteria: distance, date, or relevance. Select a card to open its detail page. A green dot means the profile is online; a yellow dot indicates recent activity. Distance is calculated from the location saved in your user settings. To see profile distances, search for and save your location. Other users must also set their location before the system can calculate the distance.

The visibility of profile data and galleries is controlled by the user. When a profile is created, fields inherit a default visibility type, but it can be changed at any time. The visibility types are:

- Public: the field can be seen by anyone, even without an account or sign-in.
- Registered: the field is visible to a signed-in user with an account.
- Subscribed: the field is visible to users with an active subscription.

In addition to the fields, the profile detail page shows the main image and galleries. Galleries are displayed by title, and their thumbnails have a size defined by the platform.

You can use the WhatsApp button when the publisher has provided that channel. You can also start an internal conversation from the profile when available.

3. Galleries and unlocks

Galleries have four visibility levels. If you do not have sufficient visibility to view a gallery or its content, it is shown blurred with a lock overlay.

The levels are:

- Level 1: Galleries are visible to any anonymous internet user, even without registering on the platform.
- Level 2: Galleries are visible to a signed-in user with an account.
- Level 3: Galleries are visible to registered users with an active subscription.
- Level 4: Galleries are visible only after an on-demand payment.

Gallery prices for subscribers are always lower than for non-subscribers, and the content publisher sets the price. The administrator reserves the right to change this discount unilaterally.

Prices have minimum, maximum, and reference values. Accessing paid galleries requires wallet credit, but an active subscription is not required. Subscribers receive a 50% discount compared

with non-subscribers. Gallery-unlock payments are shared equally between the publisher and the platform. The minimum, maximum, and reference prices are:

Gallery unlock price	Subscriber	Non-subscriber
Minimum price	5	10
Maximum price	50	100
Reference price	10	20

Table 1. Gallery unlock prices.

The reference price is proposed by the system when the user does not set a price for the gallery. A gallery unlock lasts 7 days.

A content publisher with an active subscription has a number of free private-gallery unlocks for promotional purposes. The number depends on the subscription type: initially 1 for Silver, 2 for Golden, and 3 for Platinum.

4. Wallet subscriptions and transfers

From My Account you can check your wallet, transactions, purchases, and subscription. You can top up the wallet and use its balance on the platform to unlock content or transfer it to another user. Customer balances are not refundable in cash, although they can be transferred to another person. Publishers can transfer their balance to their personal account through a Stripe connection or PayPal.

Subscriptions are recurring monthly or non-recurring weekly. There are three subscription types for publishers and one for customers. Publisher plans are Silver, Golden, and Platinum, with three different prices. The following table shows the subscription prices. Subscriptions can be cancelled at any time, but remain active until the end of the applicable period. A subscription is not refundable. Cancellation stops the following and later charges after the currently active term.

4.1 Differences between publisher subscriptions in profiles

Subscription	Period	Cost	Visibility	Grid size	Visit history	Free galleries	Max profile images	Max profile videos
Not signed in / no subscription	N/A	N/A	Level 1	H x W	N/A	0	N/A	N/A
Signed in / no subscription	N/A	N/A	Levels 1, 2	H x W	N/A	0	5	0
Silver weekly	N/A	4.99	Levels 1, 2, 3	1.5 x (H x W)	1 day	1	10	1
Silver monthly	Month	9.99	Levels 1, 2, 3	1.5 x (H x W)	1 day	1	10	1
Golden weekly	N/A	5.99	Levels 1, 2, 3	2 x (H x W)	7 days	2	15	2
Golden monthly	Month	14.99	Levels 1, 2, 3	2 x (H x W)	7 days	2	15	2
Platinum weekly	N/A	9.99	Levels 1, 2, 3	2.5 x (H x W)	30 days	3	20	5
Platinum monthly	N/A	19.99	Levels 1, 2, 3	2.5 x (H x W)	30 days	3	20	5

Table 2. Subscription price table.

H is usually between 80 and 100 px, and W is usually between 100 and 120 px.

5. Ads

In Ads you can browse ads by city, save them as favourites, and contact the advertiser through the available channel. To create or edit your ads, open Manage My Ads. Complete the required fields, add photographs, and set a location if you want to display a map. Ads show an email icon for advertisers who have configured an email address in their ad details.

Ads within a city can be sorted by distance from you, update date, or relevance. You can also mark one or more cities to view while ignoring the rest. To do this, mark any ad in the city you are interested in as a favourite.

User ads have a validity period limited by the platform configuration, currently set to 90 days.

Image and video upload limits for ads depend on the subscription type:

Subscription	Maximum images per ad	Maximum videos per ad
Not registered	N/A	N/A
Customer or publisher without subscription	3	0
Customer with subscription	20	5
Publisher with weekly Silver subscription	5	1
Publisher with monthly Silver subscription	5	1
Publisher with weekly Golden subscription	10	2
Publisher with monthly Golden subscription	10	2
Publisher with weekly Platinum subscription	20	5
Publisher with monthly Platinum subscription	20	5

Table 3. Ad limits table.

6. Messages notices and reports

The Messages area contains your internal conversations and shows notices of pending messages. Respect other users and do not send unsolicited communications.

To report a profile, open its detail page, select Report profile, choose a reason, and describe the case. For conversations, use the report option in the chat. Reports are reviewed by administration.

7. Publisher guide

Profile

In My Content > My Profile, complete your visible name, presentation details, location, and requested fields. The short description and full presentation appear only on the detail page. Other fields can have their visibility defined by the configuration. Each user can decide whether each field is public, visible to registered users, or visible to subscribers.

Galleries and content

In My Content > My Galleries, create galleries, add photos or videos, and assign the correct access level. Set the price when the gallery has unlockable content. Use an appropriate image as the cover when the option is available. The number of image and video uploads allowed can be checked in the table in section 4.

Only publish content for which you have rights and valid consent from every identifiable person. Do not publish illegal or misleading content, content involving minors, or content that infringes third-party rights.

The profile becomes visible once the ad is published from My Ads by selecting Publish ad. Publishing within the gallery alone is not enough.

Income and withdrawals

The publisher wallet records applicable income from content sales. From the Wallet menu option you can review transactions and request a withdrawal through the enabled methods. Requests are subject to review and the platform conditions. The platform may apply fees at its discretion, and they may change without notice. From this menu option you can also redeem any vouchers the administrator may assign to grant subscriber permissions.

Who has viewed me

This feature depends on the publisher subscription level: Silver shows up to 24 hours, Golden up to one week, and Platinum up to one month. Anonymous visits do not identify the visitor. See the table in section 4.

8. Account settings

In Settings you can update your details, location, and available preferences. Save a valid location to improve distance sorting. Review notices regularly and keep your sign-in email address current.

9. Location and travel

To receive distance information in relation to other users, set your location in Settings. Enter the city in the search box and mark your position on the map. You can also select My Location and then save it. If you plan to travel elsewhere and want to appear in that location’s grid, set this in User Settings. Specify where you will be and, a few days before arriving, you will appear in the destination grid. The usual number of days is 7, but it can be changed by the administrator. Enter a travel start and end date. During the 7 days before your arrival and on the departure date itself, you appear in the destination grid with an airplane icon. The icon shows a landing airplane before arrival and a parked airplane while you are travelling.

10. Other settings options

In User Settings you can also enable two-factor authentication, change your password, choose one of the available avatars or upload one, and choose to hide your profile or ads.

11. Wallet

The Wallet contains all functions related to funds:

- Top up wallet
- Subscribe
- Transfer to another user

- Withdraw funds (not available to customers)

12. Rules of use

The account is personal and non-transferable. Respect applicable laws, image rights, and privacy. The platform may moderate, blur, reclassify, demonetise, suspend, or remove content that breaches its rules.

For issues concerning security, payments, or content, use the support channels shown in the application and provide the URL, a clear description, and any relevant information.
